* If item 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/002491

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-16	YES
	Claims		NO
Inventive step (IS)	Claims	1-16	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-16	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

1.

Document DE 44 26 610 (D1) is regarded as the prior art closest to the subject matter of claim 1 and discloses an air-conditioning process and device for a stationary vehicle from which the subject matter of claims 1 and 10 differs in that:

- information on available on-board means and resources is determined by a device suitable for that purpose and
- this information is used as the selection criterion for the most suitable air-conditioning means.

The problem solved by the invention consists in the selection of an air-conditioning means which is suitable for achieving a pre-set air-conditioning state while using the smallest possible quantity of resources.

None of the documents cited in the search report shows or suggests the combinations of features in claims 1 and 10. The subject matter of claims 1 and 10 is therefore novel and inventive (PCT Article 33(2) and 33(3)).

International application No.

PCT/EP2004/002491

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

2.

Claims 2-9 are dependent on claim 1 and claims 11-16 are dependent on claim 10. They therefore also meet the PCT novelty and inventive step requirements.

3.

Although claims 1 and 10 are drafted in the two-part form, the features known from D1 are incorrectly included in the characterising part (PCT Rule 6.3(b)).
